EXPERIENCE

Paychex, Inc. – Rochester, NY – *Software Developer II*

JAN 2016 – PRESENT

- Responsible for developing full-stack features on the redesign of Paychex's single-page SaaS, a client facing web app to more than 650,000 companies nationwide and 1 in 12 employees in the private sector.
- Contribute in a team of 4 developers and 2 testers using Agile; collaborating daily with UX and business peers to ensure a top-notch product and prevent technical debt while providing solutions that scale.
- In addition to daily project work, I have been involved in dozens of projects and efforts such as internal chrome extension development, on-boarding third party vendor solutions, and managing code reviews for Statement of Work teams.

LINK – Ithaca, NY – *Student Web Developer Lead*

MAY 2015 – DEC 2016

- Led the technical design for the development of classroom software used at Ithaca College for assignments and grading. Using the data collected we created a graph simulation using MeteorJS to visualize similarities in data points.

EDUCATION

Ithaca College – *B.A. Computer Science/Psychology*

2013 – 2015 Ithaca, NY

Tompkins-Cortland Community College – *A.A.S. Web Design*

2011 – 2013 Dryden, NY
